Re: Four (4) Photos of Area Disturbed at the M-H Claims Bolter Pass Area

Dear Mike:

As you are aware, this area at our Bolter Claims was disturbed by Ames Construction as they were conducting the feasibility of using this unique calcium carbonate deposit to contain oil in the Gulf oil spill, BP America. Ames was working with Al McKee on the project and Al McKee told me he was communicating with Larry Garahana. Al told me that Ames wanted to complete a crushing test to make certain this soft ore could be processed. Al asked permission from McFarland and Hullinger and I agreed to the test, provided I guided the mining. He assured me that Ames would not begin mining until I arrived at the pit site. When I arrived at the pit, Ames personnel had already pushed through the ridge. I was angry, but the damage had been done. I would have insisted that Ames stay within the confines of the footprint of the original and long standing pit. There was clearly a communication mix up, but the damage had been done.

Apparently, Ames told Al that they would reclaim this area, but have not completed the work. We realize that McFarland and Hullinger / Broken Arrow is responsible for the claims and we have decided to reclaim the breach. We have delayed completing this reclamation because of the extreme fire danger in the area. However, with the rain and cool temperatures, we believe now is an appropriate time to move forward.

I have enclosed four photos of the area. We will utilize a D8 size dozer to complete the job. If you have suggestions, and if you and/or Larry want to visit the site prior to work beginning, we will cooperate in every way.

We do have a question on the area that Ames flattened to stockpile its ore and to accommodate its crusher, (see photo D). It has surprised us that this flat area has re-vegetated naturally. We need advice if this area is ok with BLM or will additional remediation be required.

Thank you for your help. We value our relationship with you, Larry, and your staff. We look forward to your response.

Yours very truly,

Sidney K. Hullinger  
Senior Vice President

View from Highway 36. We will reclaim the area circled.  
Photos B and C are close up views of A.

B

C

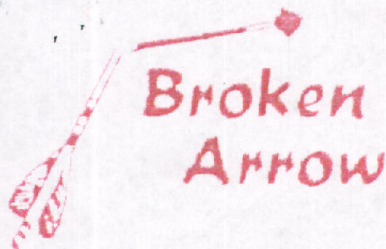

D

This area was originally disturbed, but has re-vegetated naturally. This flat area has been utilized by campers and hunters. Question: Is this vegetation good enough or do we need additional remediation?

Re: Reclamation Bolter Pass Area

Dear Mike:

The reclamation of the disturbed area in the Bolter Pass area has been completed. As per your suggestion, for the area that had been naturally re-vegetated, we used a disc and drill seeder. We also used the seed mix suggested by Larry Garahana.

I have included a copy of our October 17, 2012, letter sent to you and have added after photographs to compare against the before photographs.

If you have any questions, please call.

Yours very truly,

Sidney K. Hullinger  
Senior Vice President

Stephen Bunn

Note:  
Larry I have included a few more photographs  
for your file. Also, attached is a copy of the  
Seed purchased from Granite Seed.

## PACKING SLIP
